COURSE AIMS AND OBJECTIVES

During the course delegates will learn and demonstrate to a level of competence on how to operate fire fighting and fire protection equipment and how to deal with various fire situations onboard installations. Emphasis will be on working as a team under the control of a fire team leader.

LEARNING OUTCOMES

The Damage Control Team Training delegate's learning outcomes are set out below:

Delegate must be able to know and understand:

- 1) The role and key responsibilities of the Damage Control Team Member
- 2) Factors which may affect the safety of the DCT team and individual team members
- 3) Typical communication hierarchy and processes used during an incident
- 4) Typical communication methods and their limitations
- 5) Typical offshore emergency response arrangements
- 6) Hazards, hazard recognition and mitigation associated with typical fire and non-fire incidents
- 7) The key elements of incident planning and progress monitoring
- 8) The purpose, operation, performance and limitations of typical fixed fire-fighting systems used
- 9) Typical DCT team mobilization procedures
- 10) Typical closed containers and vessel fire fighting
- 11) The key elements included in an incident brief

LEARNING OUTCOMES

Delegate must be able to demonstrate:

- 11) How to select and operate the correct firefighting equipment and media to extinguish different types of fires
- 12) Breathing apparatus control board procedures
- 13) How to identify and don the appropriate emergency response PPE required for the OER team member
- 14) The operation, donning and wearer checks of working duration breathing apparatus
- 15) Participation in an incident brief
- 16) Participation as an OER team member in a specified range of fire and non-fire related incidents under the direction of the Offshore Emergency Response Team Leader (OERTL) following safe working practices and procedures
- 17) Selection and use of correct portable fire-fighting equipment
- 18) Selection, operation and flushing of foam firefighting equipment
- 19) Extinguishing of different types of fire and securing the area
- 20) Effective communication with OERTL and OER team members during an incident
- 21) The key considerations and actions whilst entering and working in the incident area
- 22) Correct search and rescue procedures and techniques
- 23) The correct steps involved in initial casualty assessment and recovery
- 24) Participation in a post-incident debrief

PRE-REQUISITES

All delegates must be in possession of a valid medical and basic fire fighting certificates.

TARGET GROUP

This course is designed for personnel designated as Damage Control team members on offshore installations.

DURATION

4 Days

CERTIFICATE VALIDITY

The DCT Training Certificate is valid for **3 years**
