MANAGEMENT OF MAJOR EMERGENCIES (MOME)

Our centres have a range of specially developed programs for the oil & gas industry in dealing with major emergencies. Our courses are conducted in our purpose-built control rooms with facilities and software to simulate emergency situations where delegates practise and demonstrate their abilities in managing emergencies. Our programs range from training for initial responders (onshore/offshore), assessment for those in control of the emergency offshore and scenario training for the emergency support teams onshore. Our training can be conducted at our centres or onsite at your location using our portable simulators. Our Johor centre holds OPITO approval for MEMIR and OIM Controlling Emergencies.

Management of Major Emergencies	
Target Group	Aimed at personnel that form part of the emergency response organisation as an initial responder
Course Objectives	During the course, delegates will gain and demonstrate to a level of competence the roles and responsibilities of an Emergency Response Manager, information management, command and control techniques, dealing with stress and leadership and team management
Duration	3 days
Validity	3 years

Onshore Management of Major Emergencies	
Target Group	Aimed at personnel that form part of the onshore emergency support organisation
Course Objectives	During the course, delegates will gain and demonstrate to a level of competence the roles and responsibilities of an Emergency Response Manager, information management, and dealing with local authorities, media and human resource issues
Duration	2 days
Validity	3 years

Management of Major Emergencies Initial Responder
