COURSE AIM AND OBJECTIVES

During the course the delegates will be able to gain a basic level of understanding and awareness of their roles and responsibility as Banksman and as a slinger and knowledge/skills necessary to control lifting operations.

COURSE LEARNING OUTCOMES

To successfully complete this training delegates must be able to explain and demonstrate the following:

1. Documentation and regulations that apply to lifting activities
2. Why it is important to plan lifting activities
3. Hazards associated with lifting operations and the appropriate control measures
4. The roles and duties of personnel in a lifting crew
5. The basic principles of crane operations
6. Common lifting appliances and lifting accessories
7. The difference between SWL and WLL of lifting equipment
8. Classification of lifts i.e. routine and non-routine (simple, complicated, complex)
9. The permit to work system as it applies to lifting operations
10. Lifting of personnel by crane for work and transfer purposes
11. Weight identification and estimation of the load

COURSE LEARNING OUTCOMES

To successfully complete this training delegates must be able to explain and demonstrate the following (continue)

12. Deciding when tag lines need to be used and their safe use
13. Planning, walking through and allowing for sufficient headroom along the route
14. Determining the load bearing capabilities of the lay down area
15. Conducting pre-use checks of lifting appliances and accessories
16. Correct positioning of personnel involved in lifting operations
17. Erecting signs and barriers or posting sentries
18. Conducting post-use checks of lifting appliances and accessories
19. Storage procedures for packing materials, lifting appliances and accessories
20. The disposal of any waste in relation to legislation and procedures

PRE-REQUISITES
